

ANGELS PUBLIC SR. SEC. SCHOOL, SHAHDARA

THE ECO-GAZETTE: EARTH DAY SPECIAL EDITION

OUR POWER, OUR PLANET

From April 17th to April 22nd, our campus was transformed into a vibrant hub of environmental advocacy. Students from Nursery to Class XII united under a singular mission: to prove that collective action creates lasting change.

The celebration focused on three core pillars: reducing plastic pollution, promoting renewable energy, and fostering a deep-rooted respect for our natural world. Throughout the week, the school moved beyond theory, engaging in Learning through Action.

The week began with our youngest learners in Nursery and KG. Through "Show & Tell" and interactive value activities, they explored the importance of caring for life, teaching us that the smallest hands can make the biggest difference in protecting a single plant.

"He who plants a tree, plants a hope." — Lucy Larcom

From Classrooms to the Ground: Activity Highlights

The Battle Against Plastic Students in the primary wing took a decisive stand against environmental pollution. Through vivid Drawing and Coloring competitions, the message was clear: "Say NO to Plastic." * The Relay Challenge: A high-energy "Trash Pick-Up Relay Race" turned campus cleaning into a team sport, emphasizing that keeping our surroundings clean is a shared responsibility. Voices of Advocacy Middle school students channeled their creativity into advocacy. The school corridors were lined with thought-provoking slogans and artistic posters that challenged the community to rethink consumption habits and waste management.

Green Growth & Innovation

The Plantation Drive: Every section participated in planting new life on campus, contributing to the school's green canopy.

Eco Club Initiatives: Dedicated members took the mission to plant saplings.

Trash to Treasure: Students from various grades proved that "waste" is merely a lack of imagination, creating functional models and stunning displays from recycled materials.

Grand Finale: 22nd April – Honoring Our Home

The week reached an electric peak on April 22nd with a Special Morning Assembly. The school grounds transformed into a hub of celebration and commitment.

Highlights: The Earth Pledge: A collective promise to protect our natural resources. Nukkad Natak: A high-energy street play by middle schoolers on climate action. Eco-Fancy Dress: Our youngest stars as trees and Earth heroes. Open-Air Exhibition: A showcase of sustainable models and themed posters.

Every small act of care for the Earth is a big seed planted for our future."
